

## PROGRAM OVERVIEW

PowerOptions' has partnered with Sunwealth to make solar more accessible to underserved nonprofit organizations. PowerOptions conducted a robust competitive procurement to select Sunwealth, a trusted and experienced development partner that will oversee project design, installation, operation, and maintenance. As with PowerOptions' other solar programs, PowerOptions members have a new no-cost option to install solar and power their operations with clean, reliable, and affordable energy. Members benefit from pre-negotiated power purchase agreements (PPAs) that provide fixed electricity prices and savings over a 20-year agreement, providing cost savings while advancing sustainability goals. There are no capital costs or operations/maintenance responsibilities for Members.

No Upfront Costs	Trusted & Experienced Partners	Installation, Operation, & Maintenance	Pre-Negotiated Power Purchase Agreement (PPA)	Stable, low electricity price

# Go Solar at No Cost

## HOW IT WORKS

We provide quick, transparent pricing and streamlined contracting.

We design the project and manage construction and installation, while overseeing ongoing project operation and maintenance.

You put \$0 down and receive discounted electricity at a fixed-rate with Sunwealth PPA.

This program serves housing authorities, houses of worship, senior living facilities, human service group homes, community development corporations, and performing arts centers.
